

A wide-angle photograph of a vast agricultural field filled with green crops. In the background, several pieces of green and yellow agricultural machinery, including a tractor and a combine harvester, are visible. The scene is set against a dramatic sunset sky with a bright sun low on the horizon, creating a lens flare effect. The overall atmosphere is one of active farming and productivity.

**Experience**

**A prime driver of New Realms is the focus on continual improvement and every individual team member in the organisation is dedicated to the pursuit of quality. By continually reviewing and assessing our business at every level, we assure our customers that we are committed to providing them with customer service excellence and the highest quality products every time.**

# SERVICE OFFERING

New Realms service offering is our ability to offer a purchasing solution that allows our customers to minimise costs in their business. The diverse requirements of Agricultural Sector businesses can sometimes make it difficult to source products and more importantly to source them at a competitive price. Having to follow up multiple suppliers, while ensuring delivery deadlines are achieved is a challenging task and ultimately requires a dedicated, professional team.

New Realms has the experience and supplier networks to achieve all of this, which allows our customers to minimise purchasing costs and focus on their core activities. The New Realms' management team has built strong strategic alliances with suppliers that are capable of offering quality products, technical assistance, consistency in pricing and marketing support.

In an electric power system, switchgear is the combination of electrical disconnect switches, fuses or circuit breakers used to control, protect and isolate electrical equipment. Switchgear is used both to de-energize equipment to allow work to be done and to clear faults downstream.
